# Solaris 10: Free, Open, Everywhere

- Dynamic Tracing (DTrace)
- Virtualization
- Multi-level Security
- Predictive Self Healing
- ZFS
- Multithreaded since 1992
- 950 x64/x86 systems
- Dozens of performance records

Get it for free: [sun.com/solaris/get](http://sun.com/solaris/get)

# What's New: OpenSolaris 2008.05

Easy to Get, Install, Use, Maintain

- Redistributable LiveCD image
- Graphical installer
- GNOME/compiz desktop
- GNU tools
- Optimized AMP/MARS deployment software
- Network package repository
- Leverages unique Solaris capabilities

# opensolaris™

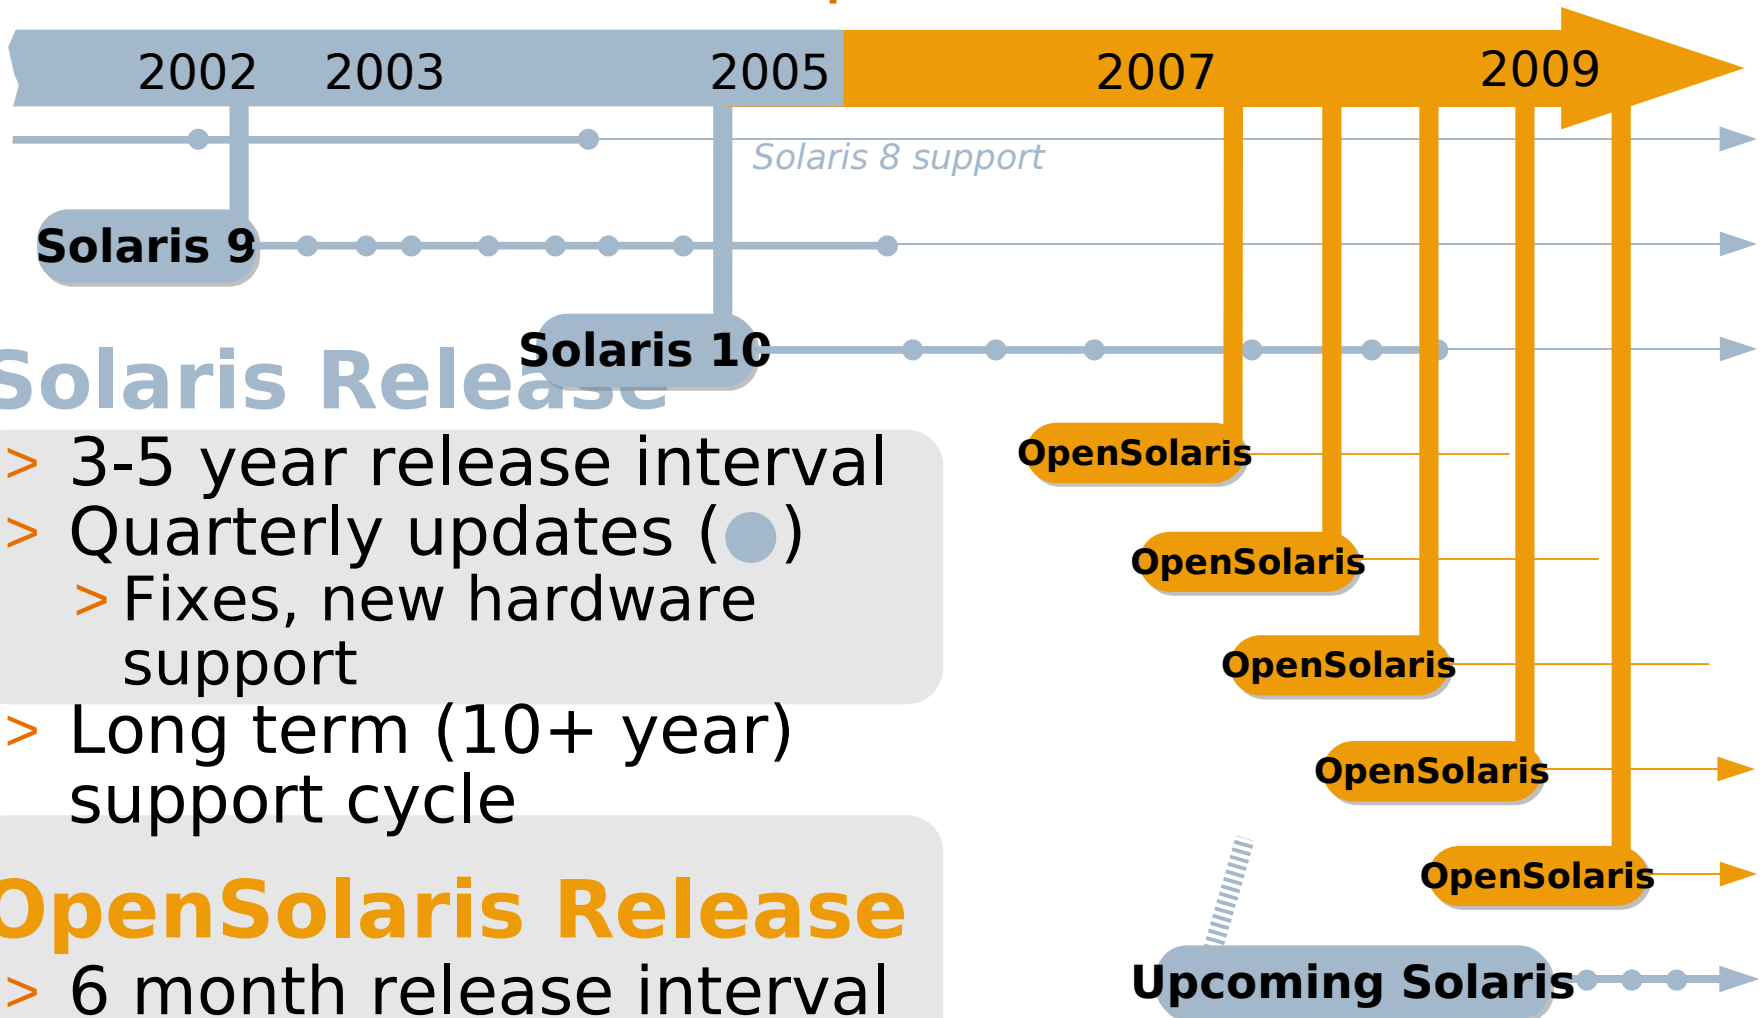

- Share Sun technology
- Promote community participation
  - 100,000+ registered members
- Faster time-to-market for innovation

**The Solaris Open Source Community**

# Solaris Release Model

20 Years, One Development Base

## Solaris Release

- > 3-5 year release interval
- > Quarterly updates (●)
  - > Fixes, new hardware support
- > Long term (10+ year) support cycle

## OpenSolaris Release

- > 6 month release interval
- > 18 month Sun support

# Next Steps

1

> Get the Solaris 10 OS  
[sun.com/solaris/get](http://sun.com/solaris/get)

2

> Get Involved
